

Day 3

☀ Status	Not Started
👤 Assign	
📅 Due	
🔍 Is Current Sprint	

Questions

1. Write the data types with their range.
2. What is the difference between local, static, and instance variables?
3. Write a program to print : (try using if-else and switch-case also)

```
age : int
name : String

if(age > 18) print "Hey welcome to the wine shop" and the name of the person
if(age < 18) print "Hey welcome to the wonderland" and the name of the person
if(age == 18) print "Hey let's play football" and the name of the person
if(age > 60) print "Hey how are you" and the name of the person
if(name.equals("Dhoni")) print "Legend"
```
